

P A T I E N T

**Know Your
Options.**

Know Your
BRCA Status.

BRCAAnalysis**CDx**[®]

The only FDA-approved blood test
to help you know your advanced
cancer treatment options.

Easy and affordable genetic testing to learn your BRCA status to determine what treatment is right for you¹

- Your *BRCA* status could determine your eligibility for advanced cancer treatments
- Only FDA-approved *BRCA1/2* test
- Affordable testing covered by majority of health plans

Patients with a personal diagnosis of any of the following cancers should consider genetic testing:

**Breast
Cancer**

**Ovarian
Cancer**

**Pancreatic
Cancer**

BRACAnalysis CDx[®] Overview

A one size fits all approach in the treatment of cancer can leave the risk of patients being over or under treated. If you or a loved one have been diagnosed with Metastatic Pancreatic, Ovarian, or Metastatic Breast Cancer, BRACAnalysis CDx identifies if you have a unique *BRCA1/2* mutation. Knowing your *BRCA* status is essential when deciding what treatments are best for you based on the features of your specific cancer.

What is BRCA?

Everyone is born with *BRCA* genes. Normally, the proteins produced by the *BRCA1* and *BRCA2* genes prevent cells from developing into cancer. When one of these genes becomes ineffective due to an inherited mutation, the cell has a hard time preventing tumors from growing, causing an increased risk for cancer.

Advanced Cancer Treatments and BRCA

Cancer cells with a germline *BRCA1/2* mutation are more vulnerable to treatments that directly or indirectly damage DNA. If you carry a *BRCA* mutation, your cancer cells are less likely to be repaired and will eventually die with the help of advanced cancer treatments like PARP inhibitory therapy.

Affordability

BRACAnalysis CDx testing is broadly covered by the vast majority of health plans and most appropriate patients pay \$0. At Myriad, we believe every patient should have access to the highest quality testing because we know how useful it is in helping healthcare providers deliver the best medical care possible. When one of our tests is ordered for you, we will work with your insurance provider to help you get the appropriate coverage allowed by your plan. If you have questions about billing or coverage, **please call Myriad at 800-469-7423 for more details.**

Process for Testing

With a simple blood test, Myriad can let you and your physician know if you are a candidate for advanced cancer treatment.

Your physician takes a blood draw

Your sample is sent to Myriad Genetics

Your physician will receive your results and will inform you if you are eligible for advanced cancer treatments

Your Next Steps For Testing

Advanced cancer treatment like targeted therapies are new forms of treatments. Ask your doctor about getting BRCA testing to guide your treatment options
